

QUALITY, ENVIRONMENT, RESEARCH, TECHNOLOGICAL DEVELOPMENT AND INNOVATION POLICY

CALVERA MAQUINARIA's main objective is to satisfy and even exceed the needs and expectations of its clients, complying with all, the requirements and regulations that could apply.

All the staff of the company, in each job position, performs its function from a client-focused perspective, understanding that the good work and the development of our Integrated Management System is everyone's responsibility.

The company's management is the driving force and maximum responsible for the aspects related to this Integrated Policy of quality, environment, research, technological development and innovation, as well as for the implementation, development and continuous improvement of the processes and the Integrated Management System of CALVERA MAQUINARIA through the following landmarks:

1. Client-focused perspective

The Company's main objective is the satisfaction of its client, having as its main objective to seek and maintain their confidence in its products and services, thus improving the effectiveness of the relationship and interactions with the client.

2. Compliance with requirements

CALVERA offers products that comply with legal, regulatory and other requirements applicable to our company..

3. Cooperation with suppliers

For CALVERA, synergies with our suppliers are fundamental to ensure that they are integrated into our production processes and participate in obtaining the highest levels of quality in our products and services, as well as in reducing environmental impact.

4. Pollution Prevention

At CALVERA we consider the prevention of pollution in our activities to be fundamental and we seek continuous improvement for an adequate environmental performance, through everyone's behaviour and good practices, with the aim of reducing the environmental impact in the production, use and disposal of all our products.

5. Sustainable Development

CALVERA's management is constantly seeking the confidence of its clients through its products and services, offering solutions environmentally responsible, providing the compliance with the Sustainable Development Goals approved in the 2030 Agenda.

6. Training and Communication

The basis of the continuous improvement and development of the company is based on the continuous training of all the staff and effective internal communication that facilitates the transmission of experiences among CALVERA MAQUINARIA's staff.

7. Error prevention and continuous improvement

We give priority to the prevention of defects, learning from mistakes and preventing them from occurring again. To achieve this, our philosophy is to do it right the first time.

8. Commitment to the prevention of damage and health deterioration

It is a fundamental aspect for the company that the development of our activities does not cause risks or health problems for our workers, contractors, subcontractors and visitors. For this reason, our priority is to work permanently on the improvement of the management related to Health and Safety at Work.

9. Innovation as the Key to success

The continuous innovation of our products and services in order to offer to clients and users the best performance at all times, opening up new markets and new opportunities, searching for the excellence and leadership in the sector, is one of our main lines of evolution and the path towards our objectives.
